The universe may not be infinite
but it is large enough for you
This heart may not be bleeding me
but it is large enough for you
Gently hold your hand
Gently feel your mind
And something tender hear
To whisper in your ear

For this

The time may not be eternal
but it is just enough for me
The holocaust will be infernal
but it is just enough for me
As i smoothly take control
As i touch your heart and hold
And i tell you something sweet
For somethings that i meet

For this

Join me and come along
Over and Beyond

Join me and come along
Over and Beyond

Join me and come along
Over and Beyond

For this
