"Some Poison"

Visit "[Some Poison](#)" on MotoLyrics.com

All the chemicals on animals
Seemed to be irrational
But they appear so sinical
it is hardly controvertial

Environmental regulation
cancer-causing expectations
to slow a deadly infection
it's pure science revelation

Some poison is good for you
some toxins may aid you
love is poison
and you need it
and it's effect will break you

Ideas been taken seriously
start to think of being endlessly
data processed periodically
on the damn laboratory

Applied on them for reproduction
Peace on earth, and on abductions
just to get an invitation
to talk in front of the past nation

some poison is good for you
some toxins may aid you
love is poison
and you need it
ant it's effect will break you

the concept
the context
the freedom
it's over

careen
careen
