"Talking About The Night"

Visit "[Talking About The Night](#)" on [MotoLyrics.com](#)

This world is not for three
but then i'm feeling free
Leave it up to me
i long to pay a fee

to be Talking about the night
Talking about the night

Getting through your mind
With a brand new sound
I'll go and kick em out
You've gotta sing it loud

to be talking about the night
talking about the night

Changing all the moods
Through the night & by the woods
Did you believe I could?
I'll clear this shit for good

Storming in & out
Make it all, run & shout
Gonna break your brouth
and then i'll change the south

So, am I right?
Is there to much light?
would you mind
talking about the night?

Talking about the night
we're talking about the night
