Hang on your feelings in the evening  
hang them on the terrace  
hang them in the evening away  
And wait on for me  
Hang them away  
Hang on your feelings in the evening  
Hang them on the terrance  
hang them in the evening away  
And follow the crowd  
Do it for me

I've been trying to see your face  
but you are turning away  
And i've been trying to touch your grace  
but you are turning away

In the very pleading time  
on the surface myself  
on the frigid complains  
of the girl in the crowd  
The freestyle of fire  
on the times of desire  
Promotes the changes  
of your heart in the ages

And i want you to  
I want you to

Hang on your feelings in the evening  
hang them on the terrace  
hang them in the evening away  
And wait on for me  
Hang them away  
Hang on your feelings in the evening  
hang them on the terrace  
hang them in the evening away  
and follow the crowd  
do it for me

For the information on silence  
you will try to decay  
the soul of the elegant vest

will complete the fate

And the very charming lines  
will combine with the water  
and the poetry will matter  
for the grief of your eyes  
and the ancient pleasures  
they will start to rise on  
for the magic desires  
that you put the price on

Hang on your feelings in the evening  
hang them on the terrace  
hang them in the evening away  
and wait on for me  
hang them away  
hang on your feelings in the evening  
hang them on the terrace  
hang them in the evening away  
and take on the time  
do it for me

Hang them in the evening away  
Hang them in the evening away  
hang them in the evening away  
Away
