"Will We Change?"

Visit "[Will We Change?](#)" on MotoLyrics.com

Goodbye to ancient time
and simple things within
we changed from ape to man
and point to pride with keen
But new world space awaits
a new phase waits for life
just hope that noone rates
what's for of those who lie

So, Will we change from past evolved
or will we doom our days involved?
will we change for good or bad
will we share new life for mad

Goodbye to ancient scripts
archaic times of sin
we grew and now we sprint
and we lose pain with gin
evolution steps us on
when cities and sky meet
we'll seek for life among
the beings that we can greet

Will we change from past evolved
or will we doom our days involved?
will we change for good or bad
will we share new life for mad
