Please bring it no further I will lose the control  
My burning inside is so real  
...and so again, the chill of ice down my spine  
...and so again, the taste of blood on my tongue  
And I see what you make me see  
And I feel what you make me feel  
Please don't hurt me, I'm not feeling to well  
Don't be around me, get off me, don't want you inside  
me  
I wish to delete you, pull the trigger and erase you

the same reaction every time you tell me this is all for  
real  
And I see what you make me see  
And I feel what you make me feel  
Your conclusion a strange solution  
To make sure I'm not afraid  
Your conclusion my own solution  
To make sure this is not for real  
And I see what you make me see  
And I feel what you make me feel
