Hey, Hey...

Sing me a song that the world can sing along  
And I'll show you a song that stands for living  
Sing me a song that the world can sing along  
And I'll show you a song from the heart

White, blinding light, that's so bright  
It enfolds you  
Scream that's your dream, it's so real  
It remoulds you

Sing me a song that the world can sing along  
And I'll show you a song that stands for living  
Sing me a song that the world can sing along  
And I'll show you a song from the heart  
Yeah, Yeah

White, blinding light, that's so bright  
It enfolds you

Sing me a song that the world can sing along  
And I'll show you a song that stands for living  
Sing me a song that the world can sing along  
And I'll show you a song from the heart
