Wings of the night
Has turned light into shadows
And through the deep forest
Only the mist prevails
Carried forth by the whispering wind

And in a glade of the deepest part of the forest
The black pounding heart of a thousand peoples fears
Thirteen figures perform the most obscure dance
Around an altar of stone while the eye of Satan
Beholds from its high seat in the starless sky

Dark eyes stares with carnal bloodlust at the fettered
virgins helpless
struggle
Claws and teeth shall desecrate the temple of her soul
and pierce the night
with her cries

The sacred blood of god's creation flow
As the eyes of the creatures woefully glow
* As gleaming red as the hair of the beasts
^?

Dreadful shadows plunges through the veils of the mist
at their
screaming prey
Claws and teeth shall desecrate the temple of her soul
and force her spirit
beyond the gates
Of black divinity

The sacred blood of gods creation drips
And run down the throats of the creatures who from
open vein sips
And the moon glows - as pale as the skin of the beasts

Three crosses breaks her skin
A soul for Satan to win

Three crosses for the price of blood
That so triumphantly brought death to the son of god

Three crosses for the breed of Cain
That throughout time in blood will reign

Three crosses for the abomination from Nod
Who so fiercely drank his brothers blood

Three crosses for the brethren of Judas

All praise the black deity
So fearsome great and mighty
Mark our spirits with thine blessing dark divine
And through our eyes you powers all will shine
Upon the forthcoming millenium

The sacred blood of gods creation is gone
And her soul is now in the hands of the horned one
Who laughs as bloodfreezing as gaze in the eyes of
the beasts

Three crosses breaks her skin
A soul for Satan to win

Three crosses for the price of blood
That so triumphantly brought death to the son of god

Three crosses for the breed of cain
That throughout time in blood will reign

Three crosses for the abomination from Nod
Who so fiercely drank his brothers blood

Three crosses...
