There's a candle in the night
There's a refuge within sight
I, I won't cry
There's a dream that I can hold
There's a hope that I can hope
I, I won't cry
CHORUS
When the sun goes black and the moon goes red
And all the final words have been said
I, I will be with You
When every dream is brought to life
And the hands of time roll back the night
I, I will be with You
There's a hand that will hold mine
And lead me to a better time
I, I won't cry
(repeat chorus)
I'm gonna be with You
I'm gonna be with You
I'm gonna be with You
I won't cry, I'm gonna be with You
Nothing can separate us
Nothing will come between us
I know one day I'm gonna be with You
No power in creation
No mortal complication
Will ever stop me from being with You
(repeat chorus)
