

Margin Of Error "Physical Body Projection"

Surreal visions of a world so strange.
Matter condensing slowly watching it vibrate.
It slows, controlled, uniform, reborn.
Shell of a mind empty inside.
Bodies lined up need to connect the wires.
Recharge, discard, infect, reject.
Signs of life distant, introvert.
Reaction machine passes as human.
No one will ever detect this.
Physical body projection.
Load it up.
Head reconnect.
Send it back.
System Failure.
It slows, controlled, uniform, reborn.
Recharge, discard, infect, reject.
No one will ever detect this.
Physical body projection.
