Visit "[Simplified](#)" on MotoLyrics.com

It's more than chemistry, I feel
Just the thought of you's surreal
Should I be afraid to feel this way
Knowing that my heart revealed

I keep thinking we're two of a kind
I've given you the sign
I can't make it any more simplified

'Cause I wanna love you, baby
No one else will do, can I
Only love you, and no one else

See, I won't hesitate or doubt

With you, I've been blessed somehow
It's like déjà vu, feels so right with you
Just seem to know what I'm about

When it's getting hard to breath
I know the only remedy
Nothing seems complicated
Don't even have to say it
You already know what I mean

I know you're feeling me
Can't make it more simplified
