And so she dances in your crystal ball
The ballerina of the baby dolls
Under a spell, you only call her name
Only her answer can undo your pain

Her swirling hand is like a magic wand
It's gonna hurt this time, the fairy dust is gone

Be a man
Don't let her do that to you
Be a man
Don't let her do that to you

She's a bad girl, gets to cry all day
The darkness is the only place that you play
The broken veins from all your wounds are raw
You're not the only boy that waits for her call

Be a man
Don't let her do that to you
Be a man
Don't let her do that to you

Oh, well, she's on the dark side
Oh, well, and it will neutralize

Be a man
Don't let her do that to you
Be a man
Don't let her do that to you

Be a man
Don't let her do that to you
Be a man
Don't let her do that to you
