You'll get the urge to push me down  
Only to learn I resurface  
I am the place where you feel safe and sound  
But I am gonna make you scream  
I am gonna crush your dreams  
Maybe you're on to my conspiracy  
But baby you fail to learn the details  
You like the fact that I am hard to read  
I am gonna hurt you bad and  
Give you love you've never had  
Baby, try to leave me I will hunt you down and you know  
that  
Baby, try to love me I will make you hurt  
Come in over me  
Come in over me
