verse 1

I'm so glad to you
I can't believe what I've found
Got yourself together, trying to move to a higher
ground
Now what have I been missing
besides from the fact that you're fine
Into your mind, and all that comes with it
So many feelings to deal with

chorus

Where do we go from here
Can we face our fear
Into a love again, and remain friends

bridge

I believe I wanna stay
So once again I'll be finding my way
Back to you

verse 2

That's just what it will be
So won't you ??? right there
And create a future
Build a life that we can share
That's what it's about
So do you mind ???
Now till forever
Somehow I know we'll end up together
I wanna know

chorus

bridge

chorus

bridge

I'll be finding my way
