I want to say it  
But I don't know you gonna to react  
Will it stay the same  
I don't won't to say it if we leave like this without say  
something  
Hold on to the pain and our heart breaking breathing  
exhale and breathing  
I don't won't to, but it hard  
I won't forget what we had  
Try to say one last good bye

### Verse 1

Before do something so shady  
We need to like before  
What cross our mine  
Before all this happen we had good  
I know what happen to that feeling  
Try one last good bye

### Pre chorus

I try to slide me  
But you won't let up  
Try to do everything you want (everything you want)  
Now how you gonna say you don't want it  
When I give all I got  
Try one last good bye

### Chorus

I want to say it  
But I don't know how you gonna to react  
If we say thing about our love  
Will it stay the same  
I don't won't to say it if we leave like this without say  
something  
Hold on to the pain and our heart breaking breathing  
exhale and breathing  
I don't won't to, but it hard  
I won't forget what we had  
Try one last good bye
