[Intro - Raw J and Oatmeal exchange]  
And strength prayed to be fearless like me  
When the lights go out at night, I can see  
Love had to ask me where I got this heart  
Been here forever, so don't put a date on my art  
Balance wondered how this plan was executed  
A foot soldier with five stars when I got recruited  
Spent nights in crowded clubs yelling at deaf ears  
When the student is ready, that's when the master  
appears

[Oatmeal]  
I give it up to those who've given  
Live it up for those who livin'  
with or with out the lights  
with or with out a fight  
I'll read and write my way to heaven  
never paint my way to hell  
I talk about the here and now I'm hopin to break these  
spells

[Raw J]  
The moon and sun could neither reach my birthplace  
My mother held me in the cold  
blankets protected my face  
A child born with no knowledge of his blood line  
But in time realized the throne is mine

[Oatmeal]  
I never walk around this place like somebody owes me  
something  
Plant the seeds of hard work so I could grow me  
something  
When the harvest season comes I'm reaping what I sew  
When the tax man comes around my way I pay back  
what I owe

[Raw J]  
Several suicide attempts on my spirit  
Drunkenly walked on this edge but heard your voice  
and didn't fear it

Without a name  
without a reason to be hoping  
Just a lock with only one key that could open  
it was you

[Oatmeal]

And it was you in and out my life but never really gone  
Every decision is mine for this life I carry on  
My definition in constant change, introspection  
I find direction inside myself  
help those who help themselves

[Raw J]

As we stood on the verge of the next chapter  
All I could hear was children and playground laughter  
Moving toward contentment not just talking the talk  
And carefree like kids skipping on the sidewalk chalk

[Hook]

[Oatmeal]

The only place in this world where everything is making  
sense  
True life experience not the fast paced condensed  
Every day life I bang it out  
I need time for hanging out  
The salty air hits my emotions  
Constant motion in this place I'm conversating with the  
breaks  
plus the breeze  
This shit can bring you to your knees  
I'm trying to grasp every moment, each second is like a  
lifetime  
Like the earth was breathing for the first time  
My broken posture with ease  
The fulfillment of these needs  
The master plan of life, yeah its hard to conceive  
And I seen it first hand  
You gotta start where you stand  
Some treating life like a pair of dice  
Its far from paradise  
No promise in this land but still we down to roll  
Take back what was stole  
Feed your fam as a whole  
you gotta harness the intangible  
Something from nothing we are  
A simple answer by far  
But we don't want it

[Raw J]

The few drops of water fell down my face

Returning me to my peoples birthplace  
The dirt embraces me, not pullin me under  
Barefooting on fields which birthed my mother  
Its hard to live as a negative, positive, derivative  
With soldiers blood taking departure  
Stealing our hearts with the aim of an archer  
But I ask can we please take it farther?  
Man, the breeze smooth talked me to no longer worry  
Cause we all dying in a hurry  
Our first and last journey  
Will I let this struggle deter me?  
Or show love till each one of ya'll burn me?  
See that's on my unwanted need  
On concrete that bleed  
Only seek to be freed  
For my unborn seed  
Till all the blind can read  
That this chess game got us feeling incomplete,  
(incomplete)  
Gotta topple the last piece  
Redefine the rules  
And not punch a clock after each and every move  
If its me vs. you, then we all going to lose  
Tired of sliding box to box in and out the blues  
Solid ground my quest till my ashes rest  
Seek completion not just pass or fail on this test  
Stopped fearing death no longer getting old  
Unifying the mind, body, and soul  
Living life as a master

[Hook]
