That week was so short but I remember it still  
We were running around and shouting out loud  
All fools are kings

I took your hand and you took mine  
We were like children of tomorrow searching for  
wonderland

All fools are kings, all fools are kings  
All fools are kings, all fools are kings

That week was intense, you entered my heart  
Became beauty of all things, we were lovers from the  
start  
All kings are fools

I stepped on your toes and you stepped on mine  
Were not able to avoid it, painful just as a lie

All fools are kings, all fools are kings  
All fools are kings, all kings are fools

If you dare I'll be there, take my hand let us run  
Through the streets and the alleys, shouting loud,  
having fun

All fools are kings, all fools are kings  
All fools are kings, all kings are fools

All fools are kings, all fools are kings  
All kings are fools, all fools are kings
