Build This Love
Cold Chisel
(Twentieth Century)

Build this love
Build this love
Build this love
Build this love

Build this love
I'm gonna build this love
I'm gonna build this fire higher and higher
Little by step by little by step

Oh yeah
I get my days
When a voice seems to whisper in my ear
"Baby you don't need this company"

Such cheap emotion
Is gonna break nobody's heart but mine
If you hold me now you can feel it beat
We can start it rockin' with a new sensation
Layin' on hands till you feel the heat
We can build this fire on a new foundation
Build this love
I'm gonna build this love
Build this fire

Outside it's colder now
It's not the time for young and stupid now
If you don't mind beating it heart to heart
We can start it rockin' with a new sensation
Layin' on hands till you feel the heat
We can take control of the situation
What's it gonna be, not another defeat
We can build this fire on a new foundation

Build this love
