Oh!We're having a heatwave, a tropical heatwave.
The temperature's rising, it isn't surprising,
she certainly can can-can.
She started a heatwave by letting her seat wave,
in such a way that the customers say
that she certainly can
can-can.
Gee,gee! Her anatomy!
makes the mercury!
To 93!
Having a heatwave, a tropical heatwave, the way that
she moves,
that thermometer proves that she certainly can...
(What's your name honey?Pablo).Certainly can..
(Chico)Certainly Can (Miguelito!) (Pablo, Chico,
Miguelito!)..oh, can-can.
Pablo, it say here in the weather report,
it's saying a fairly warm air is moving in from..(Where?)
Jamaica.
Moderately high air pressure will cover the North East
and.. (where else?)
The Deep South. Small danger of (what?) Fruit frost!
Hot and humid nights can be expected.
Vincent 95, Guadeloupe 97, Santo Domingo 99.Pardon
me? 105?
We're having a heatwave,a tropical heatwave,
the temperature's rising, it isn't surprising,
I certainly can can-can.
I started this heatwave
in such a way
that the customers say that I certainly can
can-can.The man who need makes the mercury rise to
93.
We're having a heatwave, a tropical, a tropical
heatwave
the way that I move, that thermometer grooves.
(She certainly certainly certainly can)
I certainly certainly certainly
Can! can-can!
