

ColdtrainBlues "Think People"

Visit "[Think People](#)" on MotoLyrics.com

you gotta to think people, we gotta think people, you
know we gotta think people, all i want you to do is think
people;

1. think about the woman, who starves so her kids
might eat., think about the man, with the hunnert dollar
shoes on his feet, think about the baby who
don't have any milk to drink, think a bout
the woman, with them diamonds cars and minks,

think about the children, going hungry in the street,
think about the president, somewhere sound asleep,
think about the old folks, trying to survive,
think about the rich folks, do they care if
they're alive;

bridge:

think people, (you gotta to think people)
you gotta to think people, try to make it better if you
can, (try to make it better) if you can;

2. think about the men, who make cannon guns and
tanks,
thin about the soldiers, fallin' in the ranks,
think about the man, trying to keep pace,
only to be denied, just because of his race;
think about the young generation, looking for a better
way, think about the old folks, livin' in
another day,
think about the men who went to the moon for you and
me, when they looked down at this funky world,
they saw hate and poverty;
go to bridge solo music interlude
think about the old folks, trying to survive,
think about the rich folks, do they care if
they're alive;
go to bridge

go to the bridge
