A kiss like an earthquake  
Touch like a hurricane  
I can make it rain girl  
I just need your name girl  
Have you made love  
Until you broke something, Till you broke something  
Baby listen up cause I'm gone tell you once  
When you're young in the mood for a little fun  
And the same routine gets boring  
And that dude that your with can't handle it  
If I may let me say that I got what you need  
I'm all the way original, something you ain't never seen  
Baby they say ain't nothing new under the sun  
Well I disagree  
A kiss like an earthquake  
Touch like a hurricane  
I can make it rain girl  
I just need your name girl  
Have you made love  
Until you broke something, Till you broke something  
A kiss like an earthquake  
Touch like a hurricane  
I can make it rain girl  
I just need your name girl  
Have you made love  
Until you broke something, Let's break something  
[Break Something Lyrics On ]  
Baby what you had before can't compare to this  
It's another level when you breakin shit  
A tornado in your room  
What you know about it  
You gone need insurance before we get started  
If I may let me say baby girl I ain't a thief  
I'm all the way original, something you ain't never seen  
You gone need a new bed and a new couch  
Cause U doubt you ever had  
A kiss like an earthquake  
Touch like a hurricane  
I can make it rain girl  
I just need your name girl  
Have you made love

Until you broke something, Till you broke something  
A kiss like an earthquake  
Touch like a hurricane  
I can make it rain girl  
I just need your name girl  
Have you made love  
Until you broke something, Let's break something  
Said a kiss like an earthquake yeah  
A kiss like an earthquake  
Touch like a hurricane  
I can make it rain girl  
I just need your name girl  
Have you made love  
Until you broke something, Till you broke something  
A kiss like an earthquake  
Touch like a hurricane  
I can make it rain girl  
I just need your name girl  
Have you made love  
Until you broke something, Let's break something
