(repeat 2)

One side of the story  
Your side of the story

Tell your mother, it's alright,  
tell your sisters and brothers, it's okey.  
Your friends, around the way, tell em?, come down .  
cuz they don't even know we gon? work this out.  
Cuz that's how it starts, right there,  
tell em everybody around here  
what's goin on between us, we cant let, let ?em all in  
here.

Cuz everybody ain't for us,  
especially me,  
when they only hear.

One side of the story, and then your side of the story,  
then they make up their own story.  
I wonder what would happen if the only heard my story,  
that I love you only,  
baby can't you see,  
they don't know about you and me.

I got an ide, we should get away,  
some where of the view at the ocean, for a couple of  
days.  
All night girl, we can break up to make up love.  
And clear our minds, nobody there but us.

And if the phone rings, let it ring,  
and if theres a knock on the door, let em? knock,  
and if it's the end of the world, let It end.  
At least I'll be with my girl.

Cuz everybody ain't for us,  
especially me,  
when they only hear.

One side of the story, and then your side of the story,  
then they make up their own story.  
I wonder what would happen if they only heard my

story,  
that I love you only,  
baby can't you see,  
they don't know about you and me.

When they see you cry, they don't know I'm high.  
When they feel your pain, they don't know it works on.  
but I hold it in, till I see you again.  
Cuz I don't wanna answer to nobody but you.  
(repeat 2)  
One side of the story  
Your side of the story

They only hear  
One side of the story, and then your side of the story,  
then they make up their own story.  
I wonder what would happen if they only heard my  
story,  
that I love you only,  
baby can't you see,  
they don't know about you and me.

(They don't know, what we know)
