Dust off, baby here we go again
No love lost, just another argument
So many things on your mind
Messing with your head
Are bringing out a side of me
That I don't even like
When I give, time to set some qualities
And you trip, rather being mad at me
Your loving put in line
I'll play that in line
If that's what it takes to end this fight, whoa

[Bridge]

I'm willing to write,
Your prescription just to get you through the night
I'll put you under girl
And baby you won't feel no pain
When you wake up
I'll give you my strongest dose
Mix it with a lot of love
And I'll fit you right

[Chorus]

Recovery, I would never leave you alone
Recovery, I just wanna keep you on
So just take a moment, recover, whoa

Patience means I love you
Not saying I'm the easiest man alive
But I try baby
I seem myself when I look at you
So I know just what you need
I'ma pour some tricks tonight

[Bridge]

I'm willing to write,
Your prescription just to get you through the night
I'll put you under girl
And baby you won't feel no pain
When you wake up
I'll give you my strongest dose

Mix it with a lot of love
And I'll fit you right

[Chorus]

Recovery, I would never leave you alone
Recovery, I just wanna keep you on
So just take a moment, recover, whoa

See I can leave but I'ma stat cause you deserve to be
loved

Just take a moment, recover

Not just for you, baby it's better for the both of us

I'll put you under girl

And baby you won't feel no pain

When you wake up

I'll give you my strongest dose

Mix it with a lot of love

And I'll fit you right

[Chorus]

Recovery, I would never leave you alone

Recovery, I just wanna keep you on

Oh recover, yeah, recover, aha, recover

Recover, recover, whoa, oh

Recovery
