A swollen tongue, a plastic gun
Red burn from the orange sun
These oil rigs will crack and run
These palm trees will reach out to the sun.

I've wandered, seen visions
I've gone off the deep end
I'm out there, you'll find me
I never lost that easy.

You imitate all night to stay awake
You study action intelligence
It's a lonely life by candle light
To make believe
you talk to the dead

I've wandered, seen visions
I've gone off the deep end
I'm out there, you'll find me
I never lost that easy.

A drunken confession
Seeking the bad talk
While you take your makeup off
you take yourself so serious
If we didn't laugh we're crying all the time

I've wandered, seen visions
I've gone off the deep end
I'm out there, you'll find me
I never lost that easy.

No matter where I've been,
I never could fit it
Don't worry where I'll be
I never lost that easy.
I never lost that easy.
I never lost that easy.
