Baby, I will leave you in the morning  
Sunny day I won't know what to say  
A ray of sun and ... around and stage lights  
I don't really know another way.

Baby you need to set me free.  
Baby you need to set me free.

California dream till I could sleep right  
Somewhere strange that I cannot lie  
Evil was a man that I did leave by  
No drink no one could make me come alive

Honey I don't want go away.  
Honey I don't want to go away.

Baby will you love me when I return  
Promise I will hold you in my palm  
Every night I dream you sleeping next to me

Sing a song and keep you like a bomb(?)

Baby you need to forgive me.  
Been a sinner all my life you see.

New York dream till I could sleep right  
Next to one I truly thought I loved  
Funny how the time could turn me your headlights  
Shining like a fire from a bulb.

Baby you need to forgive me  
Been a sinner all my life you see  
I'm getting higher by the moment  
Days too long and not too cold in song  
I am getting higher by the moment  
I was wrong to leave you I was wrong.
