You say, we must move forward
And I say, let's not go back
Once we were brave explorers
But this trail is a worn-out track
Don't chase that setting sun
Look what we've become

[Chorus]

Don't save me, I'll save you the hassle
Our little castle is a house of cards
It's empty, heartache is pending
This is us ending

You say, you were just kidding
And I say, this is no joke
We've grown and we're not fitting
We've flamed out to a wisp of smoke
Don't turn the truth around
It reads the same way upside-down

[Chorus]

So don't save me
Don't you dare

Little by little, sneaking upon
Till it's too much to ignore
Let's leave in the middle, before it dead ends
I've been down this road

Don't you dare leave me here
I'll go looking elsewhere!

[Chorus 2x]

So don't save me
Don't you dare
