"Brother Sun Skin"

Visit "[Brother Sun Skin](#)" on [MotoLyrics.com](#)

They stood before us
I'd say at least three million suns
nurtured plains and forest
this countries chosen ones
brother...brother sunskin
my brother...brother sunskin
white brother we should have learned like them
like sun brother sister my friend

when we first arrived here
they helped to feed our people
to them it was all clear
don't deprive the land of your soul man
brother... brother sunskin
my brother...brother sunskin
white brother we should of learned like them
brother sun sister my friend

we gave them a choice
with determination
accept our god and ways
or face your extermination
my brother...brother sunskin
brother...brother sunskin
white brother we should have learned like them
brother sun sister my friend
