Can I be a friend, with you to the end?  
'Cause I know that's written in the wind  
Take you to higher ground, come on, don't look down  
'Cause I'm showing you where to begin  
Better everything, now it all begins

You've got to fly, high, right  
It's written in the winds  
You've got to fly, high, right  
It's written in the winds, written in the winds

Well did we jump the gun? 'Cause you've come undone  
And I know you'll need more than a friend  
You're going undergrounds, well, it's not allowed  
Now I suppose that I'll be back again  
Take you back again, I'll be back again

You've got to fly, high, right  
It's written in the winds  
You've got to fly, high, right  
It's written in the winds, written in the winds, written in  
the winds

Can I be a friend, with you to the end?  
So, come on, we made it, and we've got to  
Take you to higher grounds  
Come on, and now, you won't be looking down

Well, did we jump the gun?  
'Cause now, I've seen that you have come undone,  
undone, undone  
I've seen that you have come undone, undone  
Yeah

You've got to fly, high, right  
Fly
