Complicate this world you wrapped for me
I'm acquainted with your suffering
And all your weight it falls on me
It brings me down
And all your weight it falls on me
It falls on me

Hold me up to those whom you've deceived
Promises you break you still believe
And all your weight it falls on me
It brings me down
And all your weight it brings me down
It brings me down
And all your weight it falls on me
It brings me down
And all your weight it falls on me
It falls on me

And all your weight it falls on me
It brings me down
And all your weight it falls on me
it falls on me
