Tell me i just couldn't be
Ever felt someone else
Feeling some kind of sanctuary
Losing the password to someone
All you need all you like
All that you can feel
Mutation find your own
Mutate
Mutation find your own
Mutate
I can't wait forever
Something you just might need
I can't wait forever
Bending and inbetween
Don't unleash
Tremble release
All that you can feel
I can't wait forever
Bending and inbetween
Mutation find your own
Mutate
Mutation find your own
Mutate
Some you can lean on
Some you might
Don't believe I'm safe for now
Can't find the password
Let your mind in
Who would have thought
Take all you feel
If you weren't yourself
So who would you be
Who would have got it who would feel
Some you like and some you need
Some you want and some you bleed
Some you are and some you alter
Then it's off by ten degrees
Who'd of thought who would feel
Tell me you just can't loose the password
Something you need
