

## **Marshall Law "Another Generation"**

Visit "[Another Generation](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Another generation suffers  
Hear their cries of sadness  
Now they're fighting in the streets tonight  
Some say it's racial hatred  
More like some great injustice  
It's black and white can't you read the signs

I say we have ignored  
Their poverty's bitter scorm  
All this just can't be right  
This theft on the streets of life

Another generation suffers  
I've heard it's evolution  
Just look outside as the fires burn bright  
War zones of deep frustration  
Against the degradation  
Discrimination is the real crime

Just like some awful dream  
There's nothing left but madness and great  
All this just can't be right  
Violence in the streets of life

Terror in our eyes  
How Will we survive

Another generation suffers  
Were heading for confrontation  
There's no respect and we'll pay the price  
The lack of education  
Breeds a racist nation  
Were all the same so lets get it right
