From the screen there's a chilling sound  
I see your face as you hit the ground  
Disturbing scenes that harrow me  
I'm asking you to justify  
Your policy of genocide  
Would it change if the same were done to you  
We must define diving lines, defy, until they stop  
This stop this

Voyeuristic tendency  
The media thrives on misery  
In the end we are the ones who must decide  
Totalitarian Authority  
Manipulation conquers apathy  
Water intoxication's your disease

War  
Fight this war  
War  
Fight this war

Speaking the truth is a dangerous game  
Survey the scene from a higher plane  
Subversive forces in control  
A man of peace takes a hit blood to be shed  
Don't fight the politics of death
