I'd love to make you mine  
'Cause it's the only way to hold you  
In my wild imagination  
Still I don't know how  
To grab a chance and spend some time in just  
A simple conversation

Chorus:

Just give it a try  
Though I'm not chasing rainbows in the sky  
I wanna hold you in my dreams  
And make believe that it's true  
Although I know, I know  
That it's impossible to do  
'Cause you're a star  
People love you as you are  
You're a million miles away from me

Wish that you were here  
'Cause it's illusions everytime you're close to me  
And sing me love songs  
And it's the only way  
I could tell the world I love you  
Although you're a million miles away

Chorus 2:

Just give it a try  
Though I'm not chasing rainbows in the sky  
I wanna hold you in my dreams  
And make believe that it's true  
Although I know, I know  
That it's impossible to do  
'Cause you're a star  
You're a star  
You're a star  
You're a million miles away from me
