Remember me when I'm gone  
The last thing that she told me  
Firewall in her eyes  
But nothing seemed to move me  
We've been here a hundred times  
I'm sick of this illusion  
Stripped down to the bone  
There's only one solution  
What we could or what we should  
Looking through our past won't change a thing  
It's over

I got to  
I need to  
I want to - Get away from you  
I got to  
I need to  
I want to - Get away from you  
I got to  
I need to  
I want to - Get away from you

I'm sick of you and all your lies  
And all the shit you gave me  
What you did, it wasn't right  
And I wonder if I'll ever see  
It's like a dream day and night  
And I'm not even knowing  
If I'm awake or still asleep  
The city keeps on growing  
What we could or what we should  
Looking through our past won't change a thing  
It's over

I got to  
I need to  
I want to - Get away from you  
I got to  
I need to  
I want to - Get away from you  
I got to

I need to  
I want to - Get away from you

Get away...  
Get away... get away from you

I can't hear what you say  
You're way to loud, you fly away  
I can't hear what you say  
You're way to loud, why do I care  
Why do I care

I got to  
I need to  
I want to - Get away from you  
I got to  
I need to  
I want to - Get away from you  
I got to  
I need to  
I want to - Get away from you
