Tonight, you can try to hide from me
But I can see that you're feeling good inside
Be by my side.
Now I think that you should know
Come and find me
Tonight is the night it's destined to be.

Saturday night I'm feeling uptight
It's a feeling new
My girls are on the phone
Don't want me to be alone
I've been feeling blue.
So now we're going out
We're gonna scream and shout
Good feeling's coming my way
I see you standing there
Acting like you don't care
Well I have got something to say...

Tonight, you can try to hide from me
But I can see that you're feeling good inside
Be by my side.
Now I think that you should know
Come and find me
Tonight is the night it's destined to be...
Tonight (you're my destiny)
Tonight

I move over
I touch your shoulder
Are you feeling me?
Fingers through my hair
I wanna feel you everywhere
So deep inside.
Now time is running out
Let me know what you're about
Are you sure I'm in love?
Do you wanna get with me?
Bring me down to my knees?
One night of pleasure
A treasure to keep.

Tonight, you can try to hide from me
But I can see that you're feeling good inside
Be by my side.
Now I think that you should know
Come and find me
Tonight is the night it's destined to be.
Tonight, you can try to hide from me
But I can see that you're feeling good inside
Be by my side.
Now I think that you should know
Come and find me
Tonight is the night it's destined to be.

Come and find me
If you want me
If you need me

Come and find me
Tonight
Tonight

Yeah

Tonight, you can try to hide from me
But I can see that you're feeling good inside
Be by my side.
Now I think that you should know
Come and find me
Tonight is the night it's destined to be.
Ooh
You can try to hide from me
But I can see that you're feeling good inside
Be by my side.
Now I think that you should know
Come and find me
Tonight is the night it's destined to be.
Tonight
Tonight
Tonight
