"World Without Walls"

Visit "[World Without Walls](#)" on MotoLyrics.com

Driving down the highway
Staring out the window
Speeding through a dream
It's all a state of mind
Your silence says it all
There's a smile on your face
We can drive a million miles
Till we reach the perfect place
In a world without walls
World without walls
Dance to the rhythm of our beating hearts
In a world...
Floating on a sea of glass
Moving through the night
Relax and let the evening go

Love will never die
Girl I'll never leave you
Boy you know that it is true
So forget the tears we cried
We are starting something new
In a world without walls
World without walls
Dance to the rhythm of our beating hearts
In a world...
Girl get closer
World, you gotta get closer, closer
