"Watch It Burn"

Visit "[Watch It Burn](#)" on MotoLyrics.com

We built it both together a love so strong and true
I guess we thought that nothing could tear our world in
two
But careless words and jealous hearts finally took their
toll
And now the flame of love we knew is raging out of
control
After all that we gave it now there's no way to save it
We finally reached the point of no return
All our dreams and all our hope are going up in fire
and smoke
And all that we can do is watch it burn
[steel]
If I thought that I could save it I'd gladly brave the
flames
But there's no use in trying when no love inside
remains
Oh how it brings my heart to know there's nothing I can
do
But stand and watch the fires burn what's left of me
and you
After all that we gave it...
All that we can do is watch it burn watch it burn
