I don't want to go through this life
Without you, by my side
And I've got it all worked out, in my head
Here's how it's got to be

It'll be you and me, up in the trees
And the forest will give us the answers

We, we'll make believe
In a world we rule together
We, can build our dreams
With a knot tied tight to last forever

It'll be you and me, up in the trees
And the forest will give us the answers
It'll be you and I, up in the sky
It's a combination for disaster

Yeah, yeah, yeah, yeah yeah, yeah
We got one shot
So where do we go from here?

It'll be you and me, up in the trees
And the forest will give us the answers
It'll be you and I, up in the sky
It's a combination for disaster

And I know, there's more for us in this life
