The clock beside my bed tells me it's way too late  
I know I shouldn't call you but I just can't wait  
'Cause you are on my mind, love is in my heart  
And the longin' just won't go away  
As long as you and I are far apart

I can't wait until tomorrow  
I've just gotta be with you right now  
I can't wait until tomorrow  
You know how much I want you  
You know how much I need you  
You know I've gotta love you tonight

The moon outside my window is a welcome sight  
It's holdin' back the dawn so we can have the night  
When you're in my arms and we're lyin' heart to heart  
Only love can come between us  
Only love can keep us close when we're apart

I can't wait until tomorrow  
I've just gotta be with you right now  
I can't wait until tomorrow  
You know how much I want you  
You know how much I need you  
You know I've gotta love you tonight  
You know how much I want you  
You know how much I need you  
You know I've gotta love you tonight
