Burning questions in the class, these acid tests sure
burn my ass.

And the teacher's so cold, butter wouldn't melt in her
mouth.

Draw a picture to escape, then it looked at me and
smiled.

Riding on a high horse ain't that what it's all
about, Ai, Ai,

(chorus)

Hitch your wagon to a star, look a little higher than you
are.

Don't you know that clothes make the man,
So come on, dress as bitchin' as you can.

Of all the souls in this place, you could've paved a road
a mile.

Long down my face, tell me little fella why you
ragging on me?

My friend there's 10 struggles in life,
And you only made it through 5.

You can take the heat, but you can't take the humidity.

(chorus)
