Verse 1

His name is written above my heart
Caught in this from the start
Didn't know that I would feel this way
Every word out his mouth he speaks
Is like what I think is meant to be
Didn't know that I could feel this way

Setting undernieth a palm tree
The waves are crashing over me
Like a melody and I wanna sing along
With him I know I can be myself
His smile makes me wanna melt
Like song being sung, I wanna sing along

Chours

Little did I know
That my heart could be unfroze
And I was abled to open up
Without being scared
He is the first guy I knew
That could get me out that blue
And I could learn to love
Learn to love again
Love again

Verse 2

My heart crashed on a gameboard like dice
Those other words from diamonds to ice
I didn't know it would be different
I was scared to open up looking back
But then I met a guy who changed that
Now I see how it could be different

Chours

Little did I know
That my heart could be unfroze
And I was abled to open up
Without being scared
He is the first guy I knew
That could get me out that blue

And I could learn to love
Learn to love again
Love again

Bridge
I could
I could love again
He takes me flying
Flying high
He's fly and
I know that everything's going to be alright
Love, Love, Love again

Chorus
Little did I know
That my heart could be unfroze
And I was abled to open up
Without being scared
He is the first guy I knew
That could get me out that blue
And I could learn to love
Learn to love again
Love again
