You came home late last night you smelled just like the  
scent of her  
Not only that but you had lipstick all over your shirt  
I'm thinking to myself this man has no respect for me  
I knew it all along cause you were talking in your sleep

It's a wrap  
Why you go and do me like that  
I thought the love was good  
But I misunderstood baby  
It's a wrap  
And I am not surprised  
How you could sit right here  
And look me in my eyes and tell a lie

Heard you calling her name  
In your sleep at night  
What are we gonna do  
Cause I'm through with you  
I heard you calling her name  
In your sleep at night  
What are we gonna do  
Cause I'm through with you  
I heard you

What you were saying in your sleep it violated me  
No doubt about it but there's nothing left for you and  
me  
Because you're busted and I might as well go on  
Boy it's gonna take a long time to make this a happy  
home

You know it's a wrap  
Why you go and do me like that  
I thought the love was good  
But I misunderstood baby  
It's a wrap  
And I am not surprised  
How you could sit right here  
And look me in my eyes  
And tell a lie

I heard you  
Heard you calling her name  
In your sleep at night  
What are we gonna do  
Cause I'm through with you  
I heard you calling her name  
In your sleep at night  
What are we gonna do  
Cause I'm through with you

All you had to say was I don't wanna be with you  
Why don't you tell the truth cause I already got the  
proof  
It will never be the same you know it's a crying shame  
Cause now I am disgusted cause you are so cold  
busted  
I heard you calling her name  
In your sleep at night  
What are we gonna do  
Cause I'm through with you  
I heard you calling her name  
In your sleep at night  
What are we gonna do  
Cause I'm through with you  
Heard you calling her name  
In your sleep at night  
What are we gonna do  
Cause I'm through with you  
I heard you

Why you go and do me like that  
I thought the love was good  
But I misunderstood baby  
It's a wrap  
And I am not surprised  
How you could sit right here  
And look me in my eyes and tell a lie
