Hey, don't I know you?
You look familiar
Didn't we try to make it work one time?
I remember standing at the train station crying
But the train's gone by me now and I can't say why
CHORUS
And now the dust clouds have settled on the horizon
And if I said I didn't miss you I'd be lying
Hey, don' I know you?
We walked the same road together
Reachin' for the same star on that same starry night
All the time I did believe we would go on forever
'Til I saw the end of the road and I'd headed up the
fight
CHORUS
Hey, didn't I know you?
We shared some time together
We fought a lot and now we laugh just the same
There are times I wish that I could forget and not
remember
Do you ever think that we could get it back the same?
CHORUS
