At last I've got a remedy, an antidote for misery  
The secret is within my mind, I've been-a gone-a any  
time

Now when the one I love makes me cry  
& I feel like I wanna die  
I stop for a moment (stop for a moment)  
& close my eyes (close my eyes)  
& I just drift right along into my world of dreams

In my world of dreams divine, anything I want is mine  
If love should be the thing I need, I find it in my world  
of dreams

I just pick up & leave this world behind  
& make a trip within my mind  
I stop for a moment (stop for a moment)  
& close my eyes (close my eyes)  
& I just drift right along into my world of dreams

There's no tears (in my world of dreams)  
Loneliness (never heard the word)  
No, not in my world  
My world is the happy happy world of dreams

So if your reality isn't quite what it should be  
If you should need a quick escape, I think I've got the  
perfect quake

I'm here to offer you the sacred key to the way you  
want life to be  
Just stop for a moment (stop for a moment)  
& close your eyes (close your eyes)  
& come on & drift into the world of dreams with me  
C'mon, c'mon, c'mon, come on with me into my world  
of dreams  
C'mon, c'mon, c'mon  
...& fade
