"View From A Different Window"

Visit "[View From A Different Window](#)" on MotoLyrics.com

you can hurt the one you love love the one you hurt
it goes with the territory don't you know?

you can kill the pain with the pain you can kill
if you don't know by now then you will

this is a view my friend from a different window
from a place you've never known

this is a different light falling from the sky
from another space in time

i can take you higher higher than the sun

you can lie with the truth tell a truth with a lie
but it won't make you feel any better inside

this is my anywhere this is everywhere this nowhere at
all

you can love the one you hurt hurt the one you love
it goes with the territory don't you know?

no you no you no you don't
no you no you no you no you don't
