Express your sorrow, so much pain inside  
You got to leave now, unreal life no more  
Supress your instinct, too much hate inside  
Didn't you say they loved you,  
There's nothing left for you  
It makes your bleed, excess of misery  
Disgusted with life, just lack of talk  
Lack of truth  
Silence kills, it's killing you  
Depressing state bringing you down  
Look at your friends, they stayed away  
Look at their minds, do what you say  
Chorus :  
When you feel no pleasure anymore  
Grief and pain are knocking down the door  
Heaven is being dead  
Shall you do as you said  
On the road to lust and misery  
Violent end or endless agony  
Can't you hear we call your name  
It's driving you insane

Does everybody need someone to blame  
Tell me who I've got to be then  
I don't feel the need to live anymore  
Who shall I give my last cry for  
Time to remember, time to let Rem know  
The meaning of distress  
That's why you're dying for  
Crying out with pain, suffering silently  
So much sadness in your eyes  
Will make you give in to your tears  
It makes your bleed, excess of misery  
Disguted with life, just lack of talk  
Lack of truth  
Empty spaces, dirty spaces  
Wishing you were blind  
Against all of what they say  
No matter what they care
