(Lyrics : Pascal Jorgensen / Chris Palengat)

Unceasing deforestation  
Atmospheric desintegration  
Excessive proliferation  
Parastic civilization  
Chemical factories, industries of death  
Nuclear waste, noxious gas, pesticide  
Destruction of the seas, disintegration of the ground  
Ecological disaster  
Air pollution, slow contamination  
And acid rains, corrosive death  
The green house effect  
And the ozone depletion  
Threaten life with extinction  
Sign of the times  
See the hardbingers of doom  
The die is cast  
See the digns of the decline

Politicians, governmental assholes  
Obsessed by money and by their power  
Greediness, reflection of their minds  
Stupidity of the human race  
Now you see the consequences  
Irradiation, malformations, food piosoning  
Breathing and skin disease  
Multiple cancers, psychological troubles  
Day by day  
Irreparable for centuries to come  
The die is cast  
See the signs of the decline  
You must pay  
Irreversible process  
Was it the price of progress
