Im leaving on a space ship  
and i dont know when im back again  
Blast off, trust im on my way  
To find you deep in outta space  
And i wont turn back, till youre in my grasp  
Take on any task in store  
Youre the one i adore  
Up, up and away (just got to get there)  
Cant let love escape (i need you like yeah)  
One step for mankind  
Next step's for love in my life  
Ooh and it feels like...  
I'm walking on the moon  
Reaching for the stars  
Another galaxy  
Is where ive found your heart  
Found your Heart  
Houston ive reached my destination  
beautiful is such an understatement  
Shower you with love  
Like the Meators from above  
Your Touch is like a drug  
just one hit im hooked on love  
Up, up and away (just got to get there)  
Cant let love escape (i need you like yeah)  
One step for mankind  
next step's for love in my life  
Ooh and it feels like...  
Im walking on the moon  
Reaching for the stars  
Another galaxy  
Is where ive found your heart  
Found your  
Found your  
Found your, Heart  
Touch down  
Touch down, on love [x4]
