It's a cold night and I'm starting to freeze in my lonely world

Only kisses from you can save the day  
And melt the ice around my heart

Only kisses from you  
Can stop me from feeling blue  
Conversations romance revelations  
Life is a beautiful game  
Under the sun a new day has begun and I wake up  
Wake up with the one that I love  
I begin again working till the bitter end  
My time is just a fast burning candle  
Black is the day when there's no more secret words to say  
But the music will play - Hey  
There's a moonlight and I dream in the shadow  
Rainbows flash when I'm thinking of you I know it's true  
You are like fire my sweet desire

Only kisses from you can stop me from feeling blue -  
yeah  
We begin again trying till the very end  
Life is a hard case to handle  
Black is the day when the melody has gone away  
No more music to play  
Cold night and I'm feeling the breeze in this lonely world

Only kisses from you can save the day and melt the ice  
around my heart  
Only kisses from you  
Cold night  
Yeah  
Hey  
There's a moonlight  
Only kisses from you  
Only kisses from you  
Only kisses from you can stop me from feeling blue
