Can't wait for the night  
Cause today I think I'm gonna find my for life  
Please let her see me as I am

Glad to be heard  
Cause once in a while I kinda think I'm drowned out  
Yet that ain't the case they listen hard

Place me with soul  
Cause what I can bring can only come from up there  
Here goes a taste of what I do

Before the door opens I get a knock on it  
And I ask who it is  
It says where you been and where your goin man and  
all the in between so I open up

Watchin for signs  
Cause one little flame can ignite my surprise  
If I'm on fire don't put me out

Forgettin the frail  
Cause if they don't want me I still got more around  
I can't be scared of faded things

Mama here goes  
Cause I told you I would make us all rise up now  
Whatever you want you'll have it soon

Before the door opens I get a knock on it  
And I ask who it is  
It says where you been and where your goin man and  
all the in between so I open up

Watchin signs  
I'm watchin for signs

Before I open, Before I open the doorx2  
I'm gonna shut out old lights x2
